HANDCRAFTED

PENS

Baron Fountain Pens are for Discriminating Buyers

If you're a discriminating collector of fountain pens, then the Baron Fountain Pen was designed with you in mind. Each pen is handcrafted out of some of the world's finest exotic wood and polished to a high-sheen perfection. You can choose from over sixty exotic woods from Australia, Africa, Asia or even the frontier forests of the United States.

The ink pen also is trimmed with nibs, clips and other elements made out of the highest quality Rhodium and Titanium Gold plating which gives each pen a distinguished look in addition to durability. The fountain pen features an ultra smooth threading removable cap that screws on to both the bottom and top of the pen. The Baron Fountain Pen not only is a great looking pen, it is light weight and one of the smoothest writing instruments available for everyday use and it is available with either a Fine, Medium or Broad German-made nib tip.
